Art Unit: 2876

1. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
- 4. Claims 1-11,15-16,18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schanz et al 6,328,206 in view of Sweere et al 5,842,672. Schanz discloses an ATM with an adjustable display mounting. There is disclosed a housing 40, 42 and a monitor 38 mounted on an adjustable assembly 48 (see figures 5-8). Schanz does not disclose that the adjustable assembly is a swing arm. Sweere discloses a swing arm assembly 24 for adjustably mounting a monitor display 216 (see figure 2). There is a

Application/Control Number: 10/797,656

Art Unit: 2876

pivotal support bracket 22 (col 4 line 27) for mounting the swing arm to the ATM housing. There is disclosed a three axis pivoting support 30, with individual pivot points 32,34,36 for pivoting the monitor 16 about three orthogonal axis (col 4 lines 36-50). There is disclosed a monitor bracket 38. There is disclosed a spring plunger 25. It would have been obvious to a person of ordinary skill in the art at the time of the invention to replace the support of Schanz with the swing arm support of Sweere. This would allow for three-dimensional adjustment of the monitor.

Page 3

- 5. Claims 12-14,17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 6. Claims 19-20 are allowable over the prior art of record.
- 7. The following is a statement of reasons for the indication of allowable subject matter: the prior art of record fails to teach or fairly suggest to one of ordinary skill in the art at the time of the invention, in conjunction with all the other limitations of the claims and any claim they depend from, the door through which the monitor is passed as in claims 12-14,19 and 20, and the keyboard mounted to the monitor mounting assembly as in claim 17.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karl D. Frech whose telephone number is (571) 272-2390. The examiner can normally be reached on maxi-flex.

Application/Control Number: 10/797,656 Page 4

Art Unit: 2876

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael G. Lee can be reached on (571) 272-2398. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
